^{*} Plymouth, South Hams & West Devon Local Planning Authorities' 2021, 5 Year Housing Land Supply Position Statement November 2021

Housing/continued

Taking the number of dwellings that have already been built and the number of homes secured by planning permission that have yet to start construction, we are going to be able to construct 2.5 times more homes than the JLP said were required.

Other than in exceptional circumstances, do you believe we should give consent for any more, other than possibly homes for social rent, before the next Joint Local Plan is approved?

| Local Plan is approved? |

| |
| |
| |
| At a density of just over eight dwellings per acre, using the Bloor Homes land At Sx 651 560 development at Filham as an example, accommodating 500 new homes each year will require a further 60 acres of land to be found. That will be the equivalent of imposing another settlement the size of Malborough on the landscape every year. |
| Where do you suggest that land can be found? |

Wind Turbines

The Government is proposing changes to the existing National Planning Policy Framework to enable many more wind turbines to be installed through Local Development Orders, Neighbourhood Development Orders and Community Right to Build Orders, 'providing it can be demonstrated that the planning impacts identified by the affected local community have been appropriately addressed and the proposal has community support.'

| | , |
